## **Security Update for Local Discovery Services (LDS)**

Published: July 28th, 2017

Version: 1.0

# **Executive Summary**

This security update resolves a vulnerability in Local Discovery Services (LDS) binaries which can be downloaded from the OPC Foundation website. The vulnerability could allow authorized processes to execute if an attacker has access to the file system on a machine running the affected software.

Vendors that incorporated the LDS Merge Module included in the download into their product installers must patch their installers.

This security update is rated 4.4 (medium) using the CVSS v3.0 guidelines.

The CVSS vector string is:
